

Some pupils have taken part in  * project!

At the beginning of the school year, the year 10 pupils from the workshop «HABITAT » at George Lapierre secondary school, have been asked to build 20 wooden boxes by the month of November.

Those boxes will be used by the organization called "Le Livre Vert" to collect second-hand books in libraries, schools and public places such as Darwin in Bordeaux.

Thanks to their teacher Mr. CONIL, and the JOCK SOCIETY in Lormont which provided them with the necessary pallets, the building team has taken up the challenge and the boxes will be soon delivered to the organization.

Congratulations to them for their involvement.

Now, let's see step by step how to build a wooden box!

*If you want to know more about the organization, click on the following facebook link.

<https://www.facebook.com/LeLivreVert/>

Step 1

Leonardo and Angel dismantle the pallets with a hammer and a clawbar.

Step 2

Paul and Samy remove the nails from the pallets with a nail wrench.

If it's too difficult, they fold the nails down against the wood with a hammer.

Step 3

For safety reasons, the teacher cuts the boards with a circular saw according to the good dimensions for the building of the boxes.

A LINE

Step 4

Each student draws the lines on the base and the pallets for the building of the boxes. The lines are used for the next steps.

Step 5

Soni drills holes in the boards with a drilling machine.

Step 6

Everybody builds the boxes by joining the boards and the sides on the base with screws.

They join everything with a screwdriver.
